PROFESSIONAL EXPERIENCE

- iConsult Collaborative at Syracuse University**, (Software Engineer), SU, New York **Mar 2025 – May 2026**
- Reduced manual data handling by 25% by implementing CRUD operations using Redux Toolkit and REST APIs for a client platform.
 - Increased user engagement by 20% by applying GSAP and Framer Motion animations across 2+ client websites during live demos.
 - Cut downtime incidents by 70% by revamping a client WordPress UI, updating 5+ plugins, and resolving daily compatibility issues.
 - Reduced manual order handling by 70% by integrating a payment gateway and phpMailer into an automated email and order workflow.
- Medlaunch Concepts, LLC.**, (Software Engineer Intern), Florida **Jan - May 2026**
- Redesigned and deployed the Medlaunch website in React with interactive animations, achieving 100% cross-device UI consistency.
 - Validated frontend releases via GitHub Actions CI automation, reducing post-release UI regressions by 35% through cross-browser QA.
 - Integrated interactive Graph Navigator with custom node highlight logic, reducing data discovery time during searches by 70%.
 - Partnered with QA and Design to establish a shared React component library, cutting new module setup time by 50% across the portal.
- fAlshion Inc.**, (Software Engineer Intern), San Francisco **Sept - Dec 2025**
- Implemented a multi-step onboarding flow using Next.js for the fashion.ai extension, improving user understanding of features by 75%.
 - Refactored navigation state management to maintain visibility across recommendation phases, eliminating UI drop-offs.
 - Delivered a redesigned try-on recommendation dashboard, reducing user navigation errors by 20% and improving clarity of fit insights.
 - Spearheaded the UI component audit for the recommendation engine, identifying and resolving 15+ inconsistencies before launch.
- Playtoon It, Inc.**, (Frontend Developer Intern, Lead Role), New York **May - Aug 2025**
- Launched Playtoon website with Next.js & Tailwind, improving responsiveness on 5+ devices and boosting retention by 30%.
 - Introduced light/dark mode and UI animations with Zustand and GSAP, enhancing accessibility and raising engagement by 25%.
 - Streamlined Git workflows by reviewing and merging 20+ pull requests, reducing merge conflicts by 80%.
 - Mentored 2 junior developers on Git workflows and component structure, raising the team's PR approval rate by 40%.

SKILLS

- Frontend: React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Bootstrap, GSAP, Framer Motion, Ant Design, Figma
- Mobile & Tools: React Native, Flutter, Kotlin, Swift, FlutterFlow, Git, GitHub, Postman, Vite, Docker, Playwright, Jira, WordPress
- Databases & APIs: SQL, Firebase, FastAPI, Node.js, PHP, Python, RESTful APIs, Redux Toolkit, OpenAI API, Chart.js, D3.js
- Software Process: Agile (SCRUM), CI/CD, GitHub Actions, Power Automate, Webpack
- Cloud & Deployment: Vercel, Netlify, AWS, cPanel, Render

EDUCATION

- Syracuse University** (Syracuse, New York) - **Master of Science in Computer Science- GPA 3.68/4** **May 2026**
- SVKM's NMIMS** (Mumbai, India) - **Bachelor of Technology in Computer Engineering- GPA 3.53/4** **May 2024**

ACADEMIC PROJECTS

- Agentic Scraper – Autonomous Web Extraction, SU** (Github: <https://bit.ly/4e35LrM>) **Feb – May 2026**
- Architected a Self-Improving Scraper utilizing LLM-driven reasoning to navigate complex UIs, eliminating the need for manual maintenance of CSS selectors or brittle scraping scripts.
 - Created a real-time AI dashboard in React, increasing transparency by visualizing autonomous agent steps with sub-3-second latency.
 - Developed an execution visualizer for Playwright actions, reducing agent debugging time by 50% through step-by-step reasoning logs.
- AI Grocery Price Aggregator – U.S. Edition, SU** (Github: <https://bit.ly/4dNBoXu> , Demo: <https://bit.ly/4vtdk1Q>) **Oct - Dec 2025**
- Aggregated grocery prices from Walmart, Target, and Instacart using FastAPI, reducing manual comparison time by 90%.
 - Generated AI summaries of cheapest store combinations with OpenAI API, helping users save up to 25% weekly.
 - Automated personalized deal alerts through NodeMailer and Firebase Cloud Functions to notify users about price drops in real time.
 - Coordinated a 3-person task split across scraping, frontend, and notifications, delivering the MVP 2 weeks ahead of the course deadline.
- PedeProtect, SVKM's NMIMS** (Github: <https://bit.ly/4uVW4CO>) **Dec - May 2024**
- Built a full-stack PedeProtect platform using React.js, FastAPI, and MySQL, serving 200+ users for safety issue reporting.
 - Integrated AI-based predictions into the admin dashboard, reducing manual review time by 30%.
 - Implemented image upload with geolocation tagging and preview, cutting form submission steps by 30% for users.
 - Engineered responsive dashboards with React.js and Ant Design, improving admin task completion speed by 35% in internal testing.
 - Developed REST APIs to support reporting workflows and frontend data consumption.

HACKATHONS

- ECS Challenge Hackathon, built Poster Competition Scoring App, SU **Feb 2024**
